

Want the right family fun? Produce a mess. 'Kids love a good mess and a mess can be a sign of a good time,' says award-winning writer Donna Erickson. Easy activities like playing in a huge pile of leaves or splashing in puddles after time shower become family traditions that kids remember. Families can enjoy countless interior fun, too, without giving a second thought to messes. Dig up more on the affiliated article - Visit this webpage: patent pending . Erickson's favorite task this time around of year is making apple-cinnamon clay. Adults and kids can stir up this concoction to make ornamental, aromatic decorations or cool jewelry. Erickson suggests using Kleenex Moist Cloths to make clean-up fun, when hands get desperate. It is the next best thing to flannel clean, she says. Apple-Cinnamon Clay What you'll need: 1/2 part applesauce 1/2 part cinnamon Mixing pan 2 sheets of waxed paper Running green Cookie-cutter shapes of sizes Mix equal areas of cinnamon and applesauce together. For a small order, use 1/2 glass of each. If the mixture becomes too sticky, add more cinnamon; if it is too stiff, add more applesauce. Scoop onto a piece of waxed paper. Position the additional sheet on top. Use the rolling pin to roll-out the mixture until it's about 1/2-inch thick. Decide what styles you'd like to produce. Media the cookie cutters together with the clay and cut away the additional dough. When full, place shapes on a cooling rack. Take a moment to wash the children' hands with Kleenex Moist Cloths. Enable the forms to air-dry for about twenty four hours or until hard. Enhance with paints or sparkle. Use your imagination. For case, stick a hold on the back once again to make a pin or increase bow for a necklace. CarpetFirst 78 York Street London W1H 1DP 020 8099 8444
